

American Society of Microbiology (ASM) Citation Style

Introduction

ASM uses a citation-sequence system. List your sources on a works cited page in the order in which you refer to them in your paper, and number them sequentially. Cite each source by indicating its number in parentheses in your text. For example, the first source you mention or quote should be cited in the text of your paper with the numeral 1 in parentheses. (**Note:** If the citation comes at the end of a sentence, the period should *follow* the parentheses that enclose the citation number.) The full citation for that source should appear as number one in a list of references at the end of your paper.

The following types of sources must be cited in your text and included in your list of references:

- journal articles (print, online, and in press*)
- books and book chapters (print, online, and in press*)
- patents
- theses and dissertations
- published conference proceedings
- meeting abstracts from published abstract books or journal supplements
- letters to the editor
- company publications

*A reference to an in-press ASM publication should state the control number (e.g., JCM00577-13) if it is a journal article, or the name of the publication if it is a book.

If you use EndNote, you can download ASM citation style from <http://endnote.com/downloads/style/american-society-microbiology-style-manual-asm>.

Examples

The following are examples of references to various types of sources. Note that material included in brackets ({}) is not part of the reference; it is additional information about the specific reference type.

References to material published online must provide essentially the same information contained in references to printed material. For online journal articles, posting or revision dates may replace the year of publication; a DOI (preferred) or URL is required for articles with nontraditional page numbers or electronic article identifiers.

Note on authors: ASM does not permit the use of the abbreviation *et al.* for second and subsequent authors; references must include the names of all authors, no matter how many.

Note on journal titles: In references to material published in journals, the journal title must be abbreviated according to standard practice. Appropriate journal title abbreviations can be found in the PubMed Journal Database (URL: <http://www.ncbi.nlm.nih.gov/nlmcatalog/journals>).

Print Journal Article

1. Caserta E, Haemig HAH, Manias DA, Tomsic J, Grundy FJ, Henkin TM, Dunny GM. 2012. *In vivo* and *in vitro* analyses of regulation of the pheromone-responsive *prgQ* promoter by the PrgX pheromone receptor protein. *J. Bacteriol.* **194**:3386-3394.

Online Journal Articles

2. **Winnick S, Lucas DO, Hartman AL, Toll D.** 2005. How do you improve compliance? *Pediatrics* **115**:e718-e724.
3. **Smith FX, Merianos HJ, Brunger AT, Engelman DM.** 2001. Polar residues drive association of polyleucine transmembrane helices. *Proc. Natl. Acad. Sci. U. S. A.* **98**:2250-2255. doi:10.1073/pnas.041593698.
4. **Dionne MS, Schneider DS.** 2002. Screening the fruitfly immune system. *Genome Biol.* **3**:REVIEWS1010. <http://genomebiology.com/2002/3/4/reviews/1010>.

Article in Print Book

5. **Forman MS, Valsamakis A.** 2011. Specimen collection, transport, and processing: virology, p 1276-1288. *In* Versalovic J, Carroll KC, Jorgensen JH, Funke G, Landry ML, Warnock DW(ed), *Manual of clinical microbiology*, 10th ed, vol 2. ASM Press, Washington, DC.

Article in Press

6. **Cox CS, Brown BR, Smith JC.** *J. Gen. Genet.*, in press.* {Article title is optional; journal title is mandatory.}

Print Book

7. **da Costa MS, Nobre MF, Rainey FA.** 2001. Genus I. *Thermus* Brock and Freeze 1969, 295,AL, emend. Nobre, Trüper and da Costa 1996b, 605, p. 404-414. *In* Boone DR, Castenholz RW, Garrity GM (ed), *Bergey's manual of systematic bacteriology*, 2nd ed, vol 1. Springer, New York, NY.

Online Book

8. **Gregory ST.** 2 September 2009, posting date. Chapter 2.5.4, Structural basis for the decoding mechanism. *In* Böck A, et al (ed), *EcoSal—Escherichia coli and Salmonella: cellular and molecular biology*. ASM Press, Washington, DC. doi:10.1128/ecosal.2.5.4. {Note that each chapter has its own posting date.}

Book in Press

9. **Fitzgerald G, Shaw D.** *In* Waters AE (ed), *Clinical microbiology*, in press. EFH Publishing Co., Boston, MA.* {Chapter title is optional.}

Conference Proceedings

10. **Green PN, Hood D, Dow CS.** 1984. Taxonomic status of some methylotrophic bacteria, p 251-254. *In* Crawford RL, Hanson RS (ed), *Microbial growth on C1 compounds*. Proceedings of the 4th International Symposium. American Society for Microbiology, Washington, DC.

Company Publication

11. **Stratagene.** 2006. *Yeast DNA isolation system: instruction manual*. Stratagene, La Jolla, CA. {Use the company name as the author if none is provided for a company publication.}

Meeting Abstract Publish in Journal Supplement

12. **García CO, Paira S, Burgos R, Molina J, Molina JF, Calvo C, Vega L, Jara LJ, García-Kutzbach A, Cuellar ML, Espinoza LR.** 1996. Detection of *Salmonella* DNA in synovial membrane and synovial fluid

from Latin American patients using the polymerase chain reaction. *Arthritis Rheum.* **39**(Suppl 9):S185.

Abstracts from Abstract Books

13. **Smith D, Johnson C, Maier M, Maurer JJ.** 2005. Distribution of fimbrial, phage and plasmid associated virulence genes among poultry *Salmonella enterica* serovars, abstr P-038, p 445. Abstr. 105th Gen. Meet. Am. Soc. Microbiol. American Society for Microbiology, Washington, DC. {Abstract title is optional.}
14. **Rotimi VO, Salako NO, Mohaddas EM, Philip LP.** 2005. Abstr. 45th Intersci. Conf. Antimicrob. Agents Chemother., abstr D-1658. {Abstract title is optional.}

Dissertation

15. **O'Malley DR.** 1998. Ph.D. thesis. University of California, Los Angeles, CA. {Title is optional.}

Patent

16. **Odell JC.** April 1970. Process for batch culturing. US patent 484,363,770. {Include the name of the patented item/process if possible; the patent number is mandatory.}

Letter to the Editor

17. **Falagas ME, Kasiakou SK.** 2006. Use of international units when dosing colistin will help decrease confusion related to various formulations of the drug around the world. *Antimicrob. Agents Chemother.* **50**:2274-2275. (Letter.) {"Letter" or "Letter to the editor" is allowed but not required at the end of such an entry.}
